2023 RMB INTERNATIONALIZATION REPORT
## CONTENTS

**PART ONE**  Executive Summary .......................................................... 3

**PART TWO**  International Use of the RMB Since 2022......................... 5

I. Cross-border Use of the RMB .............................................................. 5
II. Use of the RMB in Current Account Transactions ............................... 9
III. Use of the RMB in Capital Account Transactions ............................. 13
IV. RMB-denominated Commodity Trading ........................................... 18
V. Use of the RMB in Domestic Foreign Exchange Market .................... 19
VI. The RMB as an International Reserve Currency ................................ 20
VII. Cross-border Circulation of RMB Banknotes ................................. 20
VIII. RMB Cross-border Interbank Payment System .............................. 20
IX. Central Bank Cooperation ................................................................. 21
X. RMB Interest Rate and Exchange Rate ............................................. 23

**PART THREE** Updates of Policies and Relevant Reforms ................... 26

I. Optimizing Policies on Cross-border RMB Settlement ....................... 26
II. Promoting the Two-way Opening-up of Financial Markets ................ 28
III. Improving the RMB Exchange Rate Formation Mechanism ............... 30

**PART FOUR** Development of the Offshore RMB Markets .................. 33

I. Offshore RMB Interest Rate and Exchange Rate ................................ 33
II. Offshore RMB Deposits .................................................................... 35
III. Offshore RMB Financing ................................................................. 36
IV. Issuance of RMB-denominated Central Bank Bills in the Hong Kong SAR 37
V. The RMB in Global Foreign Exchange Market .................................. 37
VI. Offshore RMB Clearing ................................................................. 38

**PART FIVE**  Looking Ahead ................................................................. 40

I. Optimizing the Fundamental Institutional Arrangements for Cross-border Use of the RMB ... 40
II. Continuing to Promote the Institutional Opening-up of Financial Markets ................. 40
III. Enhancing the RMB’s Role as a Financing Currency .......................... 41
IV. Cultivating a Favorable Ecosystem for the International Use of the RMB .................. 41
V. Defending the Bottom Line Whereby No Systemic Risks Will Occur ............... 41
Part SIX  Highlights of RMB Internationalization .......................... 44

Afterword ...................................................................................... 84

Since 2022, following the guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, the People’s Bank of China (PBOC) has resolutely implemented the decisions and arrangements of the Communist Party of China (CPC) Central Committee and the State Council. Pursuing progress while ensuring stability, the PBOC has committed to reform and opening up for mutual benefit, coordinated development and security, and promoted RMB internationalization in an orderly manner to serve the creation of a new development dynamic and promote high-quality development. The internationalization of the RMB has been advancing steadily, presenting a series of new progress and changes.

The Capacity of Cross-border RMB Business to Serve the Real Economy Has Been Enhanced. The institutional arrangements of cross-border RMB business have been improved, accompanied by the strengthening of the RMB and foreign currency policy synergies. In addition, the self-generated momentum of business entities to use cross-border RMB settlement to hedge currency mismatch risks has also been enhanced. In 2022, the total amount of cross-border RMB settlement made by banks on behalf of their clients was RMB 42.1 trillion yuan, a year-on-year (yoy) increase of 15.1%. The amount of cross-border RMB settlement of trade in goods accounted for 18.2% of total cross-border settlement of trade in goods during the same period. In the first nine months of 2023, the cross-border RMB settlement amounted to RMB 38.9 trillion yuan, a yoy increase of 24%. The cross-border RMB settlement of trade in goods accounted for 24.4% of total cross-border settlement of trade in goods, up by 7 percentage points compared with the same period last year, recording the highest level in recent years.

The Financing Currency Function of the RMB Has Improved. With the successive introduction of policies on overseas lending by domestic banks and domestic bond issuance by overseas institutions, the environment for RMB investment and financing has continued to improve. At the end of 2022, the outstanding amount of RMB international debt securities published by the Bank for International Settlements (BIS)
was 173.3 billion dollars, rising to seventh in ranking, up two places yoy. According to the statistics of the Society for Worldwide Interbank Financial Telecommunication (SWIFT), the RMB’s share in global trade finance was 3.91% at the end of 2022, up by 1.9 percentage points yoy, ranking third. The share rose to 5.8% in September 2023, up 1.6 percentage points yoy, moving up to second.

Trading in Offshore RMB Markets Became More Active. In 2022, The PBOC and the Hong Kong Monetary Authority (HKMA) signed a standing swap agreement and expanded the size of the arrangement, which further deepened the financial cooperation between mainland China and the Hong Kong Special Administrative Region (SAR). Since 2022, new RMB clearing banks have been established in Laos, Kazakhstan, Pakistan, and Brazil successively, enabling the consistent optimization of overseas RMB clearing network. At the end of 2022, the RMB deposit balance in major offshore markets was about RMB 1.5 trillion yuan, returning to a record high. The BIS 2022 survey showed that the share of the RMB used in foreign exchange transactions in the global markets increased from 4.3% to 7% in the past three years, ranking up to fifth from eighth.

In the next stage, guided by Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, the PBOC will thoroughly implement the guidelines of the 20th National Congress of the CPC, and promote RMB internationalization in an orderly manner with a market-oriented approach and leaving choices to enterprises. Focusing on trade and investment facilitation, the PBOC will further improve the institutional and infrastructure arrangements for cross-border RMB investment and financing as well as transaction settlement, accelerate the transition of financial markets towards institutional opening-up, and build a more favorable investment environment. The PBOC will deepen bilateral currency cooperation, support the healthy development of offshore RMB markets, and facilitate a virtuous cycle of RMB usage between onshore and offshore markets. Meanwhile, the PBOC will improve the macroprudential management framework for cross-border capital flows integrating the RMB and foreign currencies, and enhance the capabilities of risk prevention and control while pursuing opening-up, thereby defending the bottom line whereby no systemic risks will occur.
Since 2022, the cross-border use of the RMB has continued to grow steadily. The share of the RMB in total cross-border settlement has further increased, and the overall balance of payments and receipts has been maintained.

I. Cross-border Use of the RMB

In 2022, the total amount of cross-border RMB settlement was RMB 42.1 trillion yuan, a yoy increase of 15.1%. Receipts totaled RMB 20.5 trillion yuan, a yoy increase of 10.9%, while payments totaled RMB 21.6 trillion yuan, a yoy increase of 19.5%. The ratio of receipt-to-payment was 1:1.05. In the first nine months of 2023, the amount of cross-border RMB settlement was RMB 38.9 trillion yuan, a yoy increase of 24.4%. According to the statistics of SWIFT, the RMB’s share as a global payments currency stood at 2.15% in December 2022. This share has risen every month since February 2023 to hit 3.71% in September 2023, and remained fifth.
Box 1  Currency Internationalization Composite Index

The PBOC set up a composite index for assessing the status of currency internationalization by referencing other currency internationalization indices and indicators used in the SDR review. At the end of 2022, the RMB internationalization composite index was 3.16, a yoy increase of 5.9%. During the same period, the index of major international currencies, namely the USD, the EUR, the GBP, and the JPY was 58.3, 22.18, 7.73, and 5.24 respectively. At the end of the first quarter of 2023, the RMB internationalization composite index was 3.26, a yoy increase of 10.2%. During the same period, the index of major international currencies, namely the USD, the EUR, the GBP, and the JPY was 57.68, 22.27, 7.66, and 5.48 respectively.

Shanghai, Beijing, and Shenzhen continued to rank top 3 in terms of cross-border RMB settlement volume. In 2022, they each accounted for 46.4%, 21.4%, and 7.8% of the total cross-border RMB settlement nationwide. In 2022, there were 18 provinces (autonomous regions and municipalities directly under the central government) each having cross-border RMB settlement over RMB 200 billion yuan. 8 border provinces and autonomous regions shared aggregated RMB settlement of RMB 881.62 billion
yuan, a yoy increase of 40.1%. In the first nine months of 2023, Shanghai, Beijing, and Shenzhen accounted for 43.6%, 20.9%, and 8.3% of the total RMB cross-border settlement nationwide, respectively.

Source: The People’s Bank of China.

In 2022, cross-border RMB settlement between mainland China and the Hong Kong SAR accounted for 50.3% of the total amount, ranking first. Singapore (10.3%), the United Kingdom (5.9%), and the Macao SAR (4.0%) ranked from second to fourth. The settlement of the top 10 countries and regions accounted for 82.5% of the total cross-border RMB settlement, up from 77.8% in 2021.

In 2022, cross-border RMB settlement between China and BRI (Belt and Road Initiative) participating countries registered RMB 7.1 trillion yuan, a yoy increase of 4.4%, accounting for 16.9% of the total cross-border RMB settlement. Among them, RMB 2.3 trillion yuan was for trade in goods, a yoy increase of 75.7%; RMB 230.75 billion yuan was for service trade, a yoy increase of 35.4%; and RMB 780.79 billion yuan was for direct investment, a yoy increase of 13.9%. In the first nine months of 2023, cross-border RMB settlement between China and BRI participating countries
totaled RMB 6.5 trillion yuan, a yoy increase of 19%, accounting for 16.7% of the total cross-border RMB settlement.

By the end of September 2023, China had signed bilateral local currency swap agreements with 30 BRI participating countries and established RMB clearing arrangements in 17 BRI participating countries.

II. Use of the RMB in Current Account Transactions

In 2022, cross-border RMB settlement under the current account grew by 32.3% yoy to RMB 10.5 trillion yuan, of which the receipts amounted to RMB 5.5 trillion yuan, increasing by 53.4% yoy, and the payments reached RMB 5 trillion yuan, increasing by 14.8% yoy. In 2022, the cross-border RMB settlement under the current account comprised 20.7% of the total cross-border settlement. In the first nine months of 2023, the cross-border RMB settlement volume under the current account increased by 35.3% yoy to RMB 10.2 trillion yuan.
1. Trade in Goods

In 2022, the total amount of the cross-border RMB settlement of trade in goods reached RMB 7.9 trillion yuan, a yoy increase of 37.2%, accounting for 18.2% of the total cross-border settlement of trade in goods during the same period, 3.5 percentage points
higher than that in 2021. Among them, the cross-border RMB settlement of general trade reached a value of RMB 5 trillion yuan, a yoy increase of 30.3%, while that of imported materials processing trade reached RMB 1.5 trillion yuan, a yoy increase of 52.7%. In the first nine months of 2023, the cross-border RMB settlement of trade in goods amounted to RMB 7.7 trillion yuan, a yoy increase of 36.6%, accounting for 24.4% of the total cross-border settlement of trade in goods during the same period, 6.2 percentage points higher than 2022.

2. Trade in Services
In 2022, cross-border RMB settlement of trade in services totaled RMB 1.2 trillion yuan, a yoy increase of 14.8%, accounting for 25.7% of total cross-border trade in services, 1.4 percentage points higher than that in 2021. In the first nine months of 2023, cross-border RMB settlement of trade in services registered RMB 1.1 trillion yuan, a yoy increase of 24.5%, accounting for 31.6% of total cross-border trade in services during the same period and an increase of 5.9 percentage points over the 2022 level.

3. Income and Current Transfers
In 2022, cross-border RMB settlement of income amounted to RMB 1.3 trillion yuan, a yoy increase of 24.3%, while that of current transfers amounted to RMB 90.2 billion yuan, a yoy increase of 17.5%. Cross-border RMB settlement of income and current transfers accounted for 56.8% of the total settlement amount under this category, 5 percentage points higher than that in 2021. In the first nine months of 2023, cross-border RMB settlement of income and current transfers totaled RMB1.3 trillion yuan, a yoy increase of 37.6%, accounting for 65.1% of the total settlement amount under this category, 8.3 percentage points higher than that in 2022.

Box 2  The Capacity of Cross-border RMB Business to Serve the Real Economy Has Been Enhanced

In recent years, with the growth of China’s economy and the continuous deepening of reform and opening-up, the demands for RMB cross-border payments and settlements, RMB investment and financing by domestic and foreign business entities have been increasing. The PBOC has attached great importance to the market demands and
responded proactively. To serve the building of a new development dynamic and promote
trade and investment facilitation, the PBOC, joined by the Ministry of Commerce (MOFCOM) and the SAFE, has been improving the institutional infrastructure for
cross-border RMB settlement of trade, investment and financing, and made efforts to
enhance the convenience of using the RMB in cross-border trade and investment, thereby
further supporting cross-border RMB business in serving the real economy.

The PBOC, jointly with the SAFE, has enhanced the cross-border RMB policy support
to new forms and models of foreign trade, including new types of offshore international
trade and cross-border e-commerce, facilitating cross-border RMB settlement for new
forms of offshore international trade including transit trade, global sourcing, overseas
contract manufacturing, overseas procurement for construction contract, etc. The PBOC
has supported and standardized the offshore lending business of banks, and prioritized
the use of local currency via setting differentiated macroprudential parameters as well as
encouraging the issuance of RMB loans. Working with the SAFE, the PBOC expanded
the pilot cash pooling scheme integrating the RMB and foreign currency management
for multinational corporations, further facilitating the integrated allocation of funds in
China and abroad by multinationals. In addition, the PBOC has orderly carried out pilot
schemes of facilitating RMB settlement of trade and investment at a higher level, and
encouraged banks to include more high-quality enterprises and large-sized key foreign
trade companies in the coverage of the facilitation measures. The PBOC has also guided
banks to simplify business processes, provide high-quality cross-border RMB financial
services, and improve the time-efficiency of cross-border RMB business handling. In the
first nine months of 2023, the RMB’s share in total cross-border settlement of trade in
goods increased to 24.4%, up by 7 percentage points from the same period last year.

In the next stage, the PBOC will continue to focus on trade and investment facilitation
based on a market-oriented approach by leaving choices to enterprises; further consolidate
the institutional infrastructure for cross-border RMB investment and financing, and
transaction settlement; continue to promote the cross-border RMB business in serving
the real economy, so as to better support business entities’ cross-border trade and
investment in the RMB by making the RMB more convenient to use.
III. Use of the RMB in Capital Account Transactions

In 2022, cross-border RMB settlement under the capital account totaled RMB 31.7 trillion yuan, a yoy increase of 10.4%. Receipts amounted to RMB 15 trillion yuan, a yoy increase of 0.5%, while payments totaled RMB 16.7 trillion yuan, a yoy increase of 21%. Cross-border RMB settlement of direct investment, portfolio investment, and cross-border financing, accounted for 20.4%, 74.5%, and 3.1% of the total amount of settlement under the capital account, respectively. In the first nine months of 2023, cross-border RMB settlement under the capital account totaled RMB 28.8 trillion yuan, a yoy increase of 19.8%.

![Figure 2-7 Monthly Cross-border RMB Settlement under Capital Account during 2021-2022](Source: The People’s Bank of China.)

1. Direct Investment

In 2022, cross-border RMB settlement for direct investments amounted to RMB 6.5 trillion yuan, a yoy increase of 11.3%. Among them, the amount of outbound direct investment (ODI) settlement was RMB 1.9 trillion yuan, a yoy increase of 17%, and the amount of foreign direct investment (FDI) settlement reached RMB 4.5 trillion yuan, a yoy increase of 9.1%. In the first nine months of 2023, cross-border RMB settlement for direct investment totaled RMB 5.6 trillion yuan, a yoy increase of 19.2%.
2. Cross-border RMB Cash Pooling Business

At the end of 2022, there was a total of 3,512 cross-border RMB cash pools nationwide. In 2022, cross-border RMB settlement under the cash pooling business amounted to RMB 4.6 trillion yuan, an increase of 20.8% yoy. In the first nine months of 2023, the cross-border RMB settlement under the cash pooling business amounted to RMB 4.6 trillion yuan.

Figure 2-9  Monthly Cross-border RMB Settlement under Cash Pooling Business during 2021-2022
(Source: The People’s Bank of China.)
3. Panda Bonds

At the end of 2022, the issuers of Panda Bonds included government-linked organizations, international development agencies, financial institutions, and non-financial enterprises, with cumulative issuances of RMB 630.8 billion yuan. In 2022, there were 52 Panda Bonds issued through China Interbank Bond Market (CIBM) and stock exchanges, with total issuances of RMB 85.07 billion yuan. In the first nine months of 2023, there were 66 Panda Bonds issued through the CIBM and stock exchanges, with total issuances of RMB 118.2 billion yuan.

![Figure 2-10 The Issuance of Panda Bonds in CIBM and Stock Exchanges](Source: The People’s Bank of China.)

**Box 3 Panda Bonds Steadily Enhance the Use of the RMB as a Financing Currency**

In recent years, along with the increase in scale and further opening-up of China’s bond market, the convenience and standardization for overseas institutions’ bond issuance in China have been increasingly optimized. In December 2022, the PBOC and the SAFE jointly issued the Notice on Matters Concerning the Proceeds Management for Yuan-Denominated Bonds Issued by Overseas Issuers in China, unified the fund management rules of “Panda Bonds” issued in the interbank bond market and the stock exchange...
bond market, promoted the integrated management of the RMB and foreign currencies, and further enhanced the convenience for overseas institutions to raise funds in China’s bond markets. In an environment of significant interest rate hikes in major developed economies, the financing cost of the RMB has thereby been reduced. By the end of September 2023, a total of 454 Panda bonds had been issued by overseas institutions in China’s bond markets with a cumulative volume of RMB 755.92 billion yuan, of which, the issuance in 2022 was RMB 85.07 billion yuan, and the issuance for the first nine months of 2023 was RMB 118.2 billion yuan, a yoy increase of 56.8%.

The Panda Bonds market presented the following features: Firstly, the issuance took place primarily through the interbank market. In 2022, the issuances in the interbank bond market were RMB 82.5 billion yuan, accounting for 97% of the total. In the first nine months of 2023, the proportion reached 97.2%. Secondly, the willingness of non-financial enterprises to issue Panda Bonds has grown. In 2022, non-financial enterprises accounted for 80% of overseas issuers. This upward trend continued in the first nine months of 2023, rising to 89.3%. Thirdly, the maturities were mainly for 3 years or less. In 2022, the Panda Bonds issuances with maturities of 3 years or less reached RMB 80.87 billion yuan, accounting for 95.1% of the total issuances. Among them, short-term bonds with maturities less than or equal to 1 year accounted for 39.8%. In the first nine months of 2023, the issuance of Panda Bonds with maturities of 3 years and less reached RMB 111.7 billion yuan, accounting for 94.5% of the total, among which the short-term bonds with maturities less than or equal to 1 year accounted for 43.5%.

In the next stage, the PBOC will further promote the development of the Panda Bonds market, enhance the breadth and depth of China’s bond market, continue to pursue a high-level two-way opening-up of the bond market in a steady and orderly manner, and optimize the policy environment for cross-border RMB investment and financing, so as to better serve the development of the real economy.

4. Portfolio Investment
In 2022, cross-border RMB settlement of portfolio investment totaled RMB 23.6 trillion yuan, a yoy increase of 10.9%. In the first nine months of 2023, cross-border RMB settlement of portfolio investment totaled RMB 21.6 trillion yuan, a
yoy increase of 19.7%.

**Bond Investment.** At the end of 2022, there was a total of 1,071 foreign institutions investing in CIBM, of which 526 were via direct access, 784 via the Bond Connect, and 239 via both channels. The RMB cross-border settlement of bond investment totaled RMB 17.7 trillion yuan in 2022, and RMB 16.7 trillion yuan in the first nine months of 2023.

**Stock Investment.** In 2022, cross-border RMB settlement via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect totaled RMB 1.6 trillion yuan. In the first nine months of 2023, cross-border RMB settlement via these schemes totaled RMB 1.4 trillion yuan.

**Qualified Foreign Institutional/ RMB Qualified Foreign Institutional Investors (QFII/RQFII).** Cross-border RMB settlement under QFII/RQFII totaled RMB 3.6 trillion yuan in 2022, and RMB 2.9 trillion yuan in the first nine months of 2023.

**Cross-boundary Wealth Management Connect.** At the end of 2022, there were more than forty thousand residents in the Guangdong-Hongkong-Macao Greater Bay Area (GBA) and 64 banks participating in the Cross-boundary Wealth Management Connect pilot scheme, with cross-border RMB settlement reaching RMB 2.22 billion yuan. The cumulative net inward remittance via Northbound reached RMB 290 million yuan, and the cumulative net outward remittance via Southbound was RMB 390 million yuan. In the first nine months of 2023, the cross-border RMB settlement of the wealth management connect scheme totaled RMB 5.16 billion yuan. In September 2023, the PBOC, the National Administration of Financial Regulation (NAFR), the China Securities Regulatory Commission (CSRC), the SAFE, the HKMA, the Hong Kong Securities and Futures Commission (HKSFC), and the Monetary Authority of Macao (AMCM) jointly decided to further enhance the Cross-boundary Wealth Management Connect pilot scheme in the GBA. In the next step, joint efforts will be made to revise and refine the relevant implementation rules or operational guidelines, in order to implement as soon as practicable.

5. Other Investments

In 2022, cross-border RMB settlement under other investment categories, such as cross-border financing and overseas lending, reached RMB 1.6 trillion yuan, a yoy decrease of 0.6%. In the first nine months of 2023, cross-border RMB settlement under other investment categories totaled RMB 1.6 trillion yuan, a yoy increase of 22.9%.

IV. RMB-denominated Commodity Trading

In 2022, cross-border RMB settlement for commodity trading maintained a relatively rapid growth. Cross-border RMB settlement for major commodities amounted to RMB 985.73 billion yuan, among which cross-border RMB settlement for green energy metals was RMB 162.36 billion yuan. In the first nine months of 2023, cross-border RMB settlement for major commodities amounted to RMB 1.5 trillion yuan.

At present, there are 23 varieties of international standardized futures and options products listed in China, including crude oil, iron ore, and purified terephthalic acid (PTA). Overseas traders have been introduced to provide pricing benchmarks for commodity trading settlement in the RMB. Shanghai crude oil futures and Dalian iron ore futures grew rapidly in terms of volume and open interest. In 2022, the total volume of crude oil futures in the Shanghai Futures Exchange was 53.581 million lots, with an average daily volume of 221,000 lots and an average daily open interest of 69,000 lots. Shanghai crude oil futures have become the world’s third-largest crude oil futures after the U.S. West Texas Intermediate Base Crude (WTI Crude) and the U.K. Brent Crude futures. The total volume of iron ore futures in the Dalian Commodity Exchange was 220 million lots, with an average daily volume of 913,000 lots and an average daily open interest of 1.182 million lots.
V. Use of the RMB in Domestic Foreign Exchange Market

Trading entities in China interbank foreign exchange (FX) market have been diversified. At the end of 2022, there were 782 members in RMB/FX spot market, 292 in RMB/FX forward market, 283 in RMB/FX swap market, 233 in RMB/FX cross currency swap market, 168 in RMB/FX option market, and 25 RMB/FX market makers.

China interbank foreign exchange market operated smoothly, and the product structure was further improved. The annual volume of RMB/FX trading was equivalent to USD 28.7 trillion, a yoy decrease of 8.3%, and the average daily volume was equivalent to USD 118.75 billion. Among them, RMB/FX spot transactions amounted to an equivalent of USD 8.3 trillion, a yoy decrease of 16.6%. RMB/FX swap transactions reached a volume equivalent to USD 19.3 trillion, a yoy decrease of 4.9%, among which overnight dollar swaps amounted to an equivalent of USD 12.6 trillion, taking 65% of the total swap volume. Currency swap amounted to an equivalent of USD 21.58 billion, a yoy decrease of 29.1%. RMB/FX forward transactions and option transactions amounted to an equivalent of USD 129.92 billion and USD 926.39 billion respectively, with a yoy increase of 19.3% and 3.7%.

In 2022, RMB transactions against non-USD foreign currencies grew steadily, with spot transactions amounting to RMB 2.1 trillion yuan, accounting for 3.7% of spot transactions in the interbank foreign exchange market, slightly down 0.4 percentage points from the previous year.

Unit: 100 million yuan
VI. The RMB as an International Reserve Currency

According to the IMF statistics, at the end of 2022, the volume of RMB reserves held by global central banks amounted to USD 298.4 billion, accounting for 2.69% of global foreign exchange reserves, up 1.62 percentage points from 2016 when the RMB was first included in the SDR currency basket, and ranking fifth among major reserve currencies. According to incomplete statistics, more than 80 overseas central banks or monetary authorities have held RMB reserves.

VII. Cross-border Circulation of RMB Banknotes

In 2022, due to the impact of the COVID-19 pandemic, overseas RMB clearing banks and participating banks had less demand for RMB banknotes, and the volume of cross-border transportation of RMB banknotes declined accordingly. The cross-border transportation of RMB banknotes by RMB clearing banks in the Hong Kong SAR, the Macao SAR, the Chinese Taipei, and Singapore totaled RMB 4.62 billion yuan. The total cross-border transportation of RMB banknotes by the RMB participating banks in neighboring countries was RMB 150 million yuan.

VIII. RMB Cross-border Interbank Payment System

In 2022, the RMB Cross-border Interbank Payment System (CIPS) operated smoothly, handling a total of 4.4 million cross-border RMB transactions with an overall value of RMB 96.7 trillion yuan, a yoy increase of 31.7% and 21.5% respectively. It processed an average of 17,671 transactions with a value of RMB 388.35 billion yuan on a daily basis. By the end of 2022, a total of 1,360 domestic and foreign institutions linked with CIPS directly or indirectly, of which 77 institutions were direct participants and 1,283 institutions were indirect participants.
IX. Central Bank Cooperation

1. Bilateral Local Currency Settlement
Since the launch of the China-Indonesia Local Currency Settlement (LCS) cooperation framework in September 2021, the business has been running smoothly and the market has been active. By the end of 2022, an accumulative amount of RMB 8.19 billion yuan of cross-border RMB settlement and an accumulative amount of RMB 3 billion yuan of CNY/IDR transactions had been completed under the China-Indonesia LCS cooperation framework. In 2022, CNY/IDR ranked 16th out of 28 currency pairs between the RMB and other currencies listed in the interbank foreign exchange market.

2. Bilateral Local Currency Swap
In 2022, the PBOC and the HKMA upgraded the local currency swap agreement to a
long-standing arrangement, which is effective for the long-term. In 2022, the PBOC renewed bilateral local currency swap agreements with central banks or monetary authorities of 7 countries and regions including the Bank Indonesia, the Monetary Authority of Singapore (MAS), and the European Central Bank. The PBOC has signed bilateral local currency swap agreements with central banks or monetary authorities of 40 countries and regions so far, of which 29 remained effective with an overall size of over RMB 4 trillion yuan. The size of the swap agreements differs from the actual amount being used. At the end of September 2023, the outstanding amount of RMB funds used by foreign monetary authorities was RMB 117.1 billion yuan, while that of foreign currency funds used by the PBOC was equivalent to RMB 3.43 billion yuan.

**Box 4 The PBOC Signed the First Standing Swap Agreement**

On 4 July 2022, the PBOC and the HKMA announced an upgrade of the existing currency swap agreement to make it a long-standing arrangement, expanding the size of the arrangement to RMB 800 billion / HKD 940 billion. This is the first standing swap agreement signed by the PBOC. Different from the bilateral currency swap agreements signed before, the standing swap agreement is effective for the long-term with no need for renewal, thereby increasing the convenience of the use of funds.

The establishment of standing swap arrangements between monetary authorities is a common international practice, and upgrading to a standing swap is in line with the trend of financial cooperation between mainland China and the Hong Kong SAR. Internationally, some central banks have already established standing swap arrangements with each other. For example, the Federal Reserve, the European Central Bank, the Bank of Japan, the Bank of England, the Bank of Canada, and the Swiss National Bank have standing swap arrangements with each other, without maturity and size limits. The European Central Bank also maintains standing swap arrangements with the Danmarks Nationalbank and the Sveriges Riksbank, with no maturity limit but a limit on the size. In recent years, the capital market interconnectivity and collaboration between the Hong Kong SAR and mainland China has deepened. The offshore RMB market in the Hong Kong SAR has grown steadily, becoming the most important offshore RMB clearing hub, as well as a financing products center, and capital pool. The standing swap
Agreement between the PBOC and the HKMA with a bigger facility size is not only in line with the need for deepening financial cooperation between the two markets, but also meets the inherent requirement from the opening-up of financial markets. It provides the Hong Kong market with more stable, long-term liquidity support, and is conducive to stabilizing market expectations as well as enhancing the market’s endogenous development momentum. All this enhances the Hong Kong SAR’s function as an offshore RMB business hub as well as an international financial center, and helps to promote the long-term prosperity and development of its financial sector.

3. Overseas Clearing Arrangements of the RMB
Since 2022, the PBOC has kept improving the RMB overseas clearing network, and designated clearing banks in Laos, Kazakhstan, Pakistan, and Brazil. At the end of September 2023, there were 31 overseas RMB clearing banks designated in 29 countries and regions.

X. RMB Interest Rate and Exchange Rate
1. RMB Interest Rate
In 2022, the RMB prime rate in the domestic money market went down first and then rose, picking up after reaching a low point in September, and closing down slightly at
the end of 2022 from a year earlier. At the end of 2022, the overnight, 7-day, 1-month, 3-month, 6-month and 1-year Shanghai Interbank Offered Rate (SHIBOR) dropped by 172 basis points (bps), 48bps, 85bps, 78bps, 82bps and 117bps respectively from the end of last year, closing at 1.96%, 2.22%, 2.35%, 2.42%, 2.51%, 2.62%, respectively.

![The Movement of Shanghai Interbank Offered Rate (2)](Source: China Foreign Exchange Trade System.)

2. RMB Exchange Rate

In 2022, the RMB exchange rate moved in both directions based on market supply and demand. The RMB depreciated against a basket of currencies throughout the year. At the end of 2022, the CFETS RMB exchange rate index was 98.67, down 3.7% from the end of 2021. The RMB fluctuated up and down against major international currencies. The highest central parity rate of the RMB against the USD was 6.3014, while the lowest was 7.2555. During 242 trading days, the RMB appreciated in 114 days and depreciated in 128 days. The biggest single-day rise and drop were 1.4% (1008bps) and 1% (681bps), respectively. The central parity of the RMB against the EUR, the GBP, and the JPY depreciated by 2.7%, appreciated by 2.5%, and appreciated by 5.8% respectively from the end of 2021.

(Source: The People’s Bank of China, China Foreign Exchange Trade System.)
PART THREE

Updates of Policies and Relevant Reforms

Since 2022, the policy framework for cross-border RMB business has been further improved to better serve the real economy and promote trade and investment facilitation. The two-way opening-up of financial markets has been consistently enhanced and the RMB exchange rate formation mechanism has been further improved, thereby playing a better role as an automatic stabilizer in adjusting the macroeconomy and the balance of payments.

I. Optimizing Policies on Cross-border RMB Settlement

In January 2022, the PBOC, together with the SAFE, issued the Notice on Overseas Lending by Banking Institutions, putting banks’ RMB and foreign currency overseas lending into integrated management, expanding the scope of banks’ RMB overseas lending business, and further supporting and standardizing domestic banks’ overseas lending business.

In May 2022, the PBOC, together with the MOFCOM and the SAFE, issued the Notice on Supporting Foreign Economic and Trade Enterprises to Enhance the Capability of Exchange Rate Risk Management, to promote the cross border RMB usage, support foreign economic and trade enterprises to hedge currency mismatch risks and encourage them to increase the scale and proportion of cross-border RMB settlement under trade in goods.

In June 2022, the PBOC issued the Notice on Supporting Cross-border RMB Settlement for New Forms of Foreign Trade, improving policies regarding cross-border RMB business for new forms of foreign trade such as cross-border e-commerce, and supporting the development of new forms and new models of foreign trade in a sound, sustainable and innovative way.

In July 2022, the PBOC, together with the SAFE, expanded the cash pooling pilot integrating the RMB and foreign currency management for multinationals, and rolled
out the second batch of pilots in Shanghai, Guangdong, Shaanxi, Beijing, Zhejiang, Shenzhen, Qingdao, and Ningbo, to further facilitate the integrated deployment of funds in China and abroad by multinationals.

In January 2023, the PBOC, together with the MOFCOM, issued the Notice on Further Supporting Foreign Economic and Trade Enterprises in Expanding the Cross-border Use of the RMB to Facilitate Trade and Investment, further facilitating the use of the RMB in cross-border trade and investment and better meeting market needs of foreign economic and trade enterprises for transaction settlement, investment and financing, risk management and so on.

In May 2023, the PBOC, together with the SAFE, decided to launch pilot programs in Beijing, Guangdong, and Shenzhen to optimize and upgrade the policies on centralized operation and management of cross-border RMB and foreign currency funds for multinational corporations, giving more freedom to enterprises in their cross-border funds management.

---

**Box 5  Further Optimizing Cross-border RMB Settlement Policies for New Forms of Trade**

The new forms and new models of foreign trade are effective forces in the development of China’s foreign trade and represent an important trend of international trade development. To implement the Opinions of the General Office of the State Council for Accelerating the Development of New Forms and New Models of Foreign Trade, and to support the sustainable and healthy development of cross-border RMB settlement for new forms of foreign trade, the PBOC issued the Notice on Supporting Cross-border RMB Settlement for New Forms of Foreign Trade to guide banks and relevant institutions to better meet the financial service needs of the business entities engaged in these new forms of foreign trade.

Firstly, the PBOC has broadened the business scope of payment institutions from trade in goods and trade in services to all current account items. The PBOC supports banks’ cooperation with payment institutions to provide cross-border RMB settlement
services for business entities engaged in new forms of foreign trade such as cross-border e-commerce and individuals’ cross border transactions under the current account. In addition, the PBOC supports payment institutions to handle salary repatriation for overseas migrant workers.

Secondly, the PBOC has specified what is required from banks, payment institutions and other related business entities for business filing and handling. It is clearly stipulated that in the process of business handling, banks and payment institutions should sign cross-border RMB settlement agreements, clearly defining the responsibilities and obligations of both parties, and continuously improving their own capabilities of verifying the authenticity and legality of transactions to ensure that the business is genuine and compliant.

Thirdly, the PBOC has specified the requirements for business authenticity verification, anti-money laundering, anti-terrorist financing, anti-tax evasion, and data reporting, to prevent and control business risks. The cross-border RMB business for new forms of foreign trade must be based on genuine and legitimate transactions. Banks and payment institutions should conduct transaction authenticity verification through management over market entities, transaction limit setting, collection and use of the electronic data of transactions, anti-money laundering and post transaction review, etc.

In the next step, the PBOC will continue to closely monitor the development of new forms of foreign trade, optimize the policy support system for the cross-border use of the RMB according to market demands, promote the high-quality development of new forms of trade, and help achieve stable macroeconomic performance.

II. Promoting the Two-way Opening-up of Financial Markets

In July 2022, the PBOC, the HKSFC, and the HKMA jointly announced to initiate the collaboration to develop mutual access between the Mainland and Hong Kong interest rate swap markets (Swap Connect), facilitating the participation of overseas investors in the domestic RMB interest rate swap market and supporting the construction of high-level financial opening-up.
In November 2022, the PBOC, together with the SAFE, issued the *Rules on Funds Invested by Overseas Institutional Investors in China’s Bond Market*. Clarifying how funds invested in the market by overseas institutional investors shall be managed, the *Rules* is conducive to making China’s bond market more accessible to overseas institutional investors.

In December 2022, the PBOC, together with the SAFE, issued the *Notice on Matters Concerning the Proceeds Management for Yuan-Denominated Bonds Issued by Overseas Issuers in China*, which clarified the requirements of proceeds management for yuan-denominated bonds issued by overseas institutions in China, to facilitate overseas institutions’ financing activities in China’s bond market.

In April 2023, the PBOC issued the *Interim Measures for the Administration of Cooperation on the Mutual Access Between Chinese Mainland and Hong Kong Interest Rate Swap Markets*, which regulated interconnection and cooperation of interest rate swap markets between the two markets, to protect the legitimate rights and interests of both domestic and overseas investors, and maintain the order of the interest rate swap market.

**Box 6 The Mainland-Hong Kong Swap Connect Was Officially Announced and Launched**

To implement the strategic plan of the CPC Central Committee and the State Council on steadily promoting the opening-up of China’s financial markets, and to promote the collaborative development of the financial derivatives markets in mainland China and the Hong Kong SAR, the PBOC, the HKSFC, and the HKMA issued a joint announcement, on July 4, 2022, on the initiation of the Swap Connect between the two markets. This was officially launched on May 15, 2023. On the first day of trading, the market operations went smoothly, and there was active trading by both domestic and overseas investors. There was a total of 162 transactions of RMB interest rate swaps completed between 20 onshore dealers and 27 offshore investors, with a total notional principal amount of RMB 8.26 billion yuan.
The opening up of China’s interbank bond market has deepened over recent years, and the demand for RMB interest rate-related risk management tools for overseas market participants has risen. Using the successful experiences of the bond market’s opening up as a basis, the PBOC, together with the HKSFC, and the HKMA, has conducted in-depth research on the clearing model of cross-border derivatives transactions, and formulated the Swap Connect collaborative outline. Under the Swap Connect mechanism, domestic and overseas investors can easily complete RMB interest rate swap transactions and centralized clearing through the connections between the infrastructure service institutions in the Mainland and Hong Kong markets, without any change of their trading habits while complying with the relevant laws and regulations of the two markets. The establishment of Swap Connect has helped investors manage interest rate risk, encouraged overseas institutions to participate in China’s bond market, promoted RMB internationalization and strengthened the Hong Kong SAR’s position as an international financial center.

In the next step, the PBOC will collaborate with the HKSFC, the HKMA, and the financial market infrastructure institutions of the two markets, to further improve the relevant institutional arrangements based on the operation of Swap Connect, which, in turn, will support the prosperous development of the Hong Kong SAR as an international financial center, as well as promote the high-quality development and high-level opening-up of China’s financial market.

III. Improving the RMB Exchange Rate Formation Mechanism

In 2022, the PBOC continued to advance the market-based reform of the RMB exchange rate, and to improve the managed floating exchange rate regime based on market supply and demand with reference to a basket of currencies, thus enabling it to play a role as an automatic stabilizer in adjusting the macroeconomy and the balance of payments. When the global economic and financial situation was complex and fluid, and the volatility in global foreign exchange market became higher, China’s cross-border capital flows as well as foreign exchange supply and demand remained in balance. Market expectations were generally stable. The RMB exchange rate moved
in both directions based on market supply and demand with more flexibility. In 2022, the CFETS RMB exchange rate index ran above 100 most of the time. Overall, the RMB has performed soundly among major global currencies and remained stable at a reasonable equilibrium level.

Box 7 Interbank Foreign Exchange Market Serves High-Level Opening-up

In recent years, the PBOC and the SAFE have taken multiple measures to promote the two-way opening-up of China’s financial markets. The interbank FX market has kept improving its arrangement for currency conversion and exchange rate risk management, and its capacity to serve the high-level opening-up has continued to improve.

Firstly, the development of the FX market is harmonized with that of the cross-border financial investment. Following the opening-up of the financial markets and the advancement of RMB internationalization, China’s FX market is more open, while gradually absorbing various types of overseas investors’ demands for FX transactions in cross-border financial activities. In conjunction with the launch of Bond Connect, the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect, CIBM Direct and other financial market opening-up channels, the PBOC has been supporting overseas investors in FX conversion and exchange rate risk hedging in China’s FX market. The FX market, the bond market, and the stock market have actively interacted in the process of opening-up. In 2022, 88% of the transactions conducted by overseas banks in the interbank FX market were related to bond investment.

Secondly, an open system to facilitate the diversified needs of investors is being built. The interbank FX market aligns with the international market practices by providing prime brokerage and trade allocation services for overseas non-bank financial institution, and agency trading services for overseas sovereign institutions, such as foreign central banks, to meet more diversified demands from overseas investors. At the end of 2022, there were 197 overseas participants in the interbank FX market, with a trading volume accounting for 7% of total transactions. The type of participants has been extended from offshore RMB clearing banks to offshore sovereign institutions, offshore participating banks, and
offshore non-bank financial institutions.

Thirdly, trading efficiency is being coordinated with risk prevention. Since 2020, third-party FX arrangements have been launched under CIBM Direct and Bond Connect respectively. Bond investors under these two schemes can trade with third parties in the FX exchange process to obtain better prices and to manage exchange rate risk both more proactively and more efficiently. To facilitate the smooth operation of the third-party FX arrangement, bond and FX transaction information on an investor basis have been monitored and the foreign exchange risk management information has been shared with banks.

Fourth, a 20-hour trading period per day has been established. According to the relevant requirements of the IMF SDR review, starting from January 3, 2023, trading hours of the interbank FX market have been further extended, with G10 currency pairs market and FX money market opening at 7:00 a.m. (closing at 23:30), and the RMB/FX market closing at 3:00 a.m. (opening at 9:30 a.m.). The total trading hours are 20 hours, covering the major trading periods of Asian, European, and North American markets. As a result, global investors’ RMB exchange rate risk management has become more convenient, the depth and breadth of the domestic FX market has been further improved, and the development of onshore and offshore FX markets has become more coordinated.

In the next step, the PBOC and the SAFE will further deepen the FX market development, focusing on building an open, diversified, well-functioning, orderly, and competitive market, to better support the high-level opening-up.
Since 2022, the offshore RMB markets have developed smoothly. The offshore and onshore RMB interest rate spreads at various tenors were mixed. The movement of offshore and onshore exchange rates was generally consistent, and the spread slightly widened. The interconnection and cooperation among domestic and overseas financial markets have kept deepening with more offshore RMB products offered, and the level of cross-border investment facilitation and liberalization continued to improve.

I. Offshore RMB Interest Rate and Exchange Rate

1. Interest Rate
Since 2022, offshore RMB interest rates have been generally stable, with higher volatility across different tenors in the first half of the year than in the second half. Overnight rate became less volatile than in 2021, and long-term rates remained generally stable. At the end of 2022, the CNH Hong Kong Interbank Offered Rate (HIBOR) for overnight and 7-day period were 1.1% and 1.6% respectively, down 582 bps and 94 bps from a year earlier respectively. The 3-month, 6-month, and 1-year CNH HIBOR were 2.5%, 2.8%, and 3.3% respectively, down 44 bps, down 27 bps, and up 11 bps from a year earlier respectively.

In 2022, interest rates in the offshore RMB market were overall higher than in the onshore market, with the CNH HIBOR 0.64 percentage points higher than the SHIBOR on average. The spread between the CNH HIBOR and the SHIBOR for 1-month period narrowed from 66 bps in the first half of the year to 43 bps in the second half. The spread between the CNH HIBOR and the SHIBOR for 3-month period widened from 72 bps in the first half of the year to 78 bps in the second half.
2. Exchange Rate

In 2022, the offshore RMB exchange rate moved in both directions, generally consistent
with the movement of the onshore RMB exchange rate, and the spread between the offshore and onshore exchange rate was stable overall. The percentage of trading days when the offshore RMB exchange rate was stronger or weaker than the onshore RMB exchange rate during the year was 31.5% and 68.5% respectively. The average daily exchange rate spread between offshore and onshore RMB for the year was 171 bps, 88 bps wider than in 2021.

![Figure 4-3 Movements of Exchange Rate of CNH/USD](Source: The People’s Bank of China, Reuters.)

II. Offshore RMB Deposits

In 2022, offshore RMB deposits remained stable. At the end of 2022, the RMB deposit balance in major offshore markets exceeded RMB 1.5 trillion yuan, basically the same as the previous year. The RMB deposit balance in the Hong Kong SAR was RMB 835.7 billion yuan, ranking first among all of the offshore RMB markets and accounting for 5.4% of all the deposit balance in the Hong Kong SAR and 10.5% of its foreign currency deposit balance. The RMB deposit balance in Chinese Taipei was RMB 195.2 billion yuan, ranking second. The RMB deposit balance in the United Kingdom was RMB 105.9 billion yuan, ranking third.
III. Offshore RMB Financing

In 2022, the offshore RMB bond market developed steadily. According to incomplete statistics, RMB 483.87 billion yuan of the RMB-denominated bonds were issued in countries and regions with RMB clearing arrangements in 2022, a yoy increase of 37%. The RMB-denominated bonds issued in the Hong Kong SAR amounted to RMB 385.34
billion yuan, a yoy increase of 29.6%. At the end of 2022, the outstanding amount of RMB-denominated bonds in countries and regions with RMB clearing arrangements was RMB 446.93 billion yuan, a yoy increase of 64.7%. The balance of the RMB-denominated Certificates of Deposits amounted to RMB 526.45 billion yuan, a yoy increase of 335.9%. In 2022, the overall scale of offshore RMB loans kept growing and the amount of outstanding RMB loans in major offshore markets reached RMB 595.55 billion yuan. The amount of outstanding RMB loans in the Hong Kong SAR was RMB 196.7 billion yuan.

IV. Issuance of RMB-denominated Central Bank Bills in the Hong Kong SAR

In 2022, the PBOC regularly issued 12 batches of RMB-denominated central bank bills in the Hong Kong SAR in a market-based form, with an amount of RMB 120 billion yuan in total. In 2022, the issuance of 3-month, 6-month, and 1-year RMB-denominated central bank bills reached RMB 40 billion yuan, RMB 20 billion yuan, and RMB 60 billion yuan respectively. In 2022, RMB-denominated central bank bills issued in the Hong Kong market were sought after by offshore investors, the oversubscription rate of each issuance exceeded 1.9 times with a peak of 4.6 times. Major investors included international financial organizations, central banks, commercial banks, funds, insurance companies, and other overseas investors, with a geographical distribution covering the Hong Kong SAR, the Macao SAR, the Chinese Taipei, Asia-Pacific, Europe, Africa, etc. Meanwhile, the RMB-denominated central bank bill repo market in the Hong Kong SAR has continued to develop and the range of participating institutions has been expanded continuously.

The regular issuance of RMB-denominated central bank bills and the development of the repo market in the Hong Kong SAR have enriched the series of RMB investment products and liquidity management tools in Hong Kong market. It has played a positive role in fostering a sound offshore RMB money market and bond market and boosting the issuance of RMB-denominated bonds, as well as extending RMB business by domestic and overseas business entities in the offshore markets.

V. The RMB in Global Foreign Exchange Market

A BIS survey released in 2022 showed that the share of the RMB used in FX transactions in global market has increased to 7%, making the RMB the fifth most
traded foreign exchange currency in the world.

According to the SWIFT statistics, the RMB ranked as the sixth most active currency for FX spot transactions by value at the end of 2022, after the USD, the EUR, the GBP, the JPY, and the CAD. Top economies conducting FX spot transactions in the RMB included the United Kingdom (38.1%), the United States (15.2%), the Hong Kong SAR (8.5%), and Switzerland (7.2%), which together accounted for approximately 70% of the value of offshore RMB/FX transactions.

VI. Offshore RMB Clearing

In 2022, the volume of RMB clearing made by overseas clearing banks totaled RMB 504.3 trillion yuan, a yoy increase of 7.7%, among which the total amount of agent clearing was RMB 54.8 trillion yuan, a yoy increase of 9.6% and the total amount of the inter-bank clearing was RMB 449.5 trillion yuan, a yoy increase of 7.5%. By the end of 2022, 970 participating banks and other institutions had opened clearing accounts in overseas RMB clearing banks. In 2022, the amount of clearing processed by Hong Kong’s RMB Real Time Gross Settlement was RMB 414.1 trillion yuan, continuing to maintain a rapid growth of 15.8% yoy.

Box 8 Continuous Innovation of RMB Products and Market Mechanism in Offshore RMB Markets

In recent years, the self-generated momentum of the offshore RMB markets has been further enhanced, and the offshore RMB markets have developed steadily and healthily.

The liquidity condition of the offshore RMB markets has gradually improved. In July 2022, the PBOC and the HKMA upgraded the currency swap agreement to a standing arrangement, which has provided the offshore RMB markets with more stable and long-term liquidity support. The PBOC supported HKMA’s and MAS’s regular use of RMB swap funds to enrich the liquidity of offshore RMB markets. Trading activities in the offshore RMB markets have become increasingly dynamic. At the end of 2022, the balance of RMB deposits in major offshore markets was RMB 1.5 trillion yuan, a historic high.
Participants in the offshore RMB markets have become more diversified and the product system has been gradually enriched. According to a survey by the BIS, the share of the RMB in global foreign exchange transaction has grown from 4.3% to 7% in the past three years, and the international ranking has risen from eighth to fifth, making it the fastest-rising currency in terms of market share. This indicates that offshore entities have been expanding their use of the RMB for exchange and risk management. In February 2023, the CSRC issued regulations to support domestic enterprises going public in overseas markets using the RMB for dividend payments. At the same time, the Hong Kong Exchanges and Clearing Limited (HKEX) launched the “HKD-RMB Dual Counter Model”, offering issuers and investors choices of HKD- and RMB-denominated shares. Cooperation on mutual access between the Mainland and Hong Kong interest rate swap markets was officially launched, allowing global investors to access the onshore derivatives market to hedge interest rate risks. The Guangdong Provincial Government, Hainan Provincial Government, and Shenzhen Municipal Government issued offshore RMB local government bonds in the Hong Kong SAR and the Macao SAR, enriching the offshore RMB markets with credit bonds. Bank of China Hong Kong has established a market-making mechanism for RMB-denominated central bank bills repo, providing RMB liquidity facility tools for overseas investors.

In the next step, the PBOC will continue to improve the RMB liquidity supply arrangement in offshore markets, enrich the product system of the offshore RMB markets in the Hong Kong SAR and other regions, foster a virtuous cycle between the onshore and offshore RMB markets, and support the healthy development of the offshore RMB markets.
In the next stage, under the guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, the PBOC will thoroughly implement the guidelines made by the 20th National Congress of the CPC, and commit to reform and opening-up for mutual benefit. Upholding the guiding principle of coordinating development and security, the PBOC will promote RMB internationalization in an orderly manner based on a market-oriented approach and leaving choices to enterprises, all to pursue high-quality development and high-level opening-up.

I. Optimizing the Fundamental Institutional Arrangements for Cross-border Use of the RMB

Taking the trade and investment facilitation as the fundamental goal, the PBOC will further consolidate the institutional foundation of cross-border RMB business, strengthen the integrated management of the RMB and foreign currencies, and improve the convenience and operational feasibility of policies to better meet the needs of using the RMB in cross-border trade and investment by market entities. The PBOC will continue to promote and optimize the pilot cash pooling program integrating the RMB and foreign currency management, coordinate and standardize the business of cross-border transfer of assets such as trade financing, and promote the construction of the “Electronic Fence” for capital in Hainan Free Trade Port and Guangdong-Macao Intensive Cooperation Zone in Hengqin.

II. Continuing to Promote the Institutional Opening-up of Financial Markets

The PBOC will continue to optimize the cross-border fund management policies for international investors to invest in China’s bond and stock market, support more central banks and monetary authorities to include the RMB in their reserves, and create a convenient and accommodating investment ecosystem, to better meet the asset allocation and risk management demands of global RMB asset investors. The PBOC will continue to optimize the policy arrangements regarding the “Cross-boundary Wealth Management Connect” pilot scheme in the GBA, again to better
meet the demands of GBA residents for high-quality financial services.

III. Enhancing the RMB’s Role as a Financing Currency

The PBOC will encourage financial institutions to actively carry out cross-border trade financing business, overseas lending, and other financing businesses in the RMB. The PBOC will support more foreign central banks, international development institutions, multinational corporations, and other high-quality issuers to issue Panda Bonds in China and support more entities such as policy-based financial institutions to issue RMB-denominated securities overseas.

IV. Cultivating a Favorable Ecosystem for the International Use of the RMB

The PBOC will strengthen currency cooperation with countries and regions with close economic and trade ties with China, and support the orderly and healthy development of offshore RMB markets. Meanwhile, the PBOC will enhance policy support for clearing banks, optimize the global layout of clearing banks, and enable them to give full play to their role as “bridges” connecting the offshore and onshore markets. In addition, the PBOC will improve the liquidity supply mechanism, provide long-term and stable RMB liquidity for offshore markets, and inspire market players to innovate and develop offshore RMB products and services.

V. Defending the Bottom Line Whereby No Systemic Risks Will Occur

The PBOC will further improve the monitoring, assessment, and early-warning system of cross-border capital flows. To address the risk of pro-cyclical fluctuations in cross-border capital flows, the PBOC will make efforts to improve the integrated macroprudential management framework for cross-border capital flows in both the RMB and foreign currencies, enrich the macroprudential management toolbox, strengthen the coordination between macroprudential management and microprudential supervision to ensure that the internationalization of the RMB advances steadily with a bottom line of security as a prerequisite.

Box 9 International Use of the RMB in 2022 Market Survey

In 2022, Bank of China conducted a market survey into the use of the RMB by domestic and overseas industrial and commercial enterprises, with a sample of over 3600
enterprises, including about 2500 domestic enterprises and 1100 overseas enterprises. The survey showed that:

Firstly, the role of the RMB as a settlement currency has been enhanced. About 82.8% of the respondents considered using or increasing the use of the RMB in cross-border transactions, the highest level in recent years.

**Figure 5-1** Proportion of Respondents Considering Increasing the Use of the RMB
(Source: Bank of China.)

Secondly, the role of the RMB as a pricing currency has weakened. The survey results showed that 18% of domestic respondents used the RMB for pricing in cross-border transactions, a slight decrease from 2021.

**Figure 5-2** Proportion of Domestic Respondents Using the RMB for Pricing during Foreign Exchange Rate Fluctuation
(Source: Bank of China.)
Thirdly, the role of the RMB as a financing currency has been improved. The survey results showed that about 78.6% of overseas respondents would consider RMB financing when liquidity of the USD, the EUR, and other international currencies was tight, 7.4 percentage points higher than the survey results in 2021. 71.8% of overseas respondents prioritized using the RMB for financing trade with China, an increase of 3.5 percentage points from the survey in 2021. The willingness of overseas enterprises to use the RMB for financing trade with China has reached a three-year high.
